# Annual Report - 2006

**Mission Statement:** To protect the citizens of the Commonwealth and to provide a safe, secure and humane environment for staff and offenders in carrying out the mandates of the legislative and judicial processes; and, to provide opportunities for offenders to acquire skills which facilitate non-criminal behavior.

## **Message from the Commissioner:**

When Governor Ernie Fletcher began his tenor 3 years ago, one of the first initiatives he introduced was the need to cut government waste and inefficiency. The Kentucky Department of Corrections stepped up to the plate and began immediately looking for ways to improve our efficiency and cut waste.

In 2006 we continued on this same path in the areas of electronic monitoring, increased half way house beds, substance abuse treatment, modern technology in our offender management system, centralized training centers, increased volunteer programs in our institutions and healthcare for the inmate population.

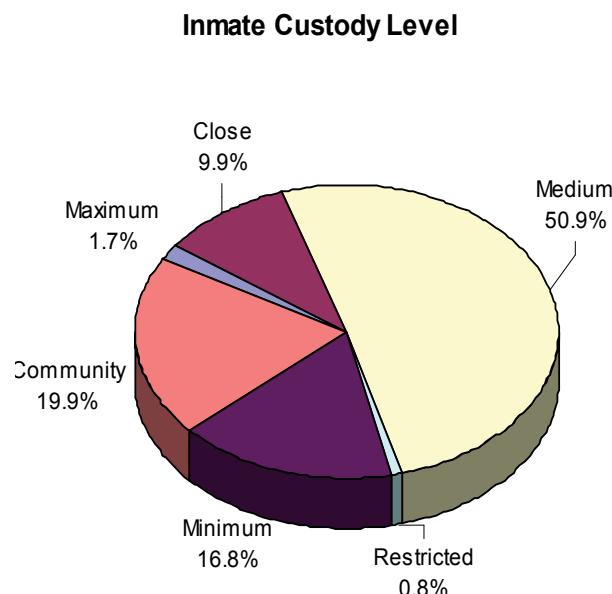

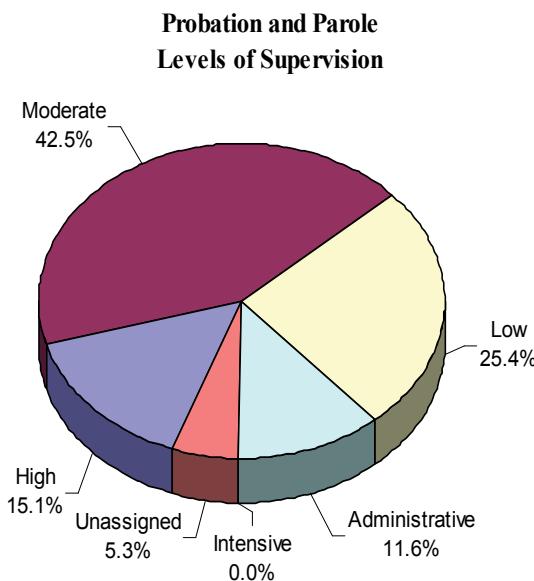

The division of Probation and Parole (P&P) received first-time national accreditation from the American Correctional Association (ACA). The accreditation program is a professional peer review process based on national standards that have evolved since the founding of ACA in 1870. The standards addressed all areas of Probation and Parole.

Our primary mission is protecting the citizens of Kentucky by incarcerating more than 20,000 inmates and supervising over 34,000 probationers and parolees. I think we can all agree that this is a huge challenge that has been successfully accomplished by the 3,822 men and women that exhibit dedication and professionalism by performing their assigned duties every day. I'd like to thank each and every member of the Department of Corrections and remind our readers that the accomplishments of 2006 have truly been a team effort.

We are grateful to Governor Fletcher, members of the General Assembly and the taxpayers of Kentucky for their support and continued efforts to ensure that we meet our goals and maintain a balanced approach to Kentucky's correctional system.

Sincerely,

John D. Rees, Commissioner

## Division of Probation & Parole Received First-time National Accreditation

For the first time in the history of Kentucky Corrections, the Division of Probation and Parole became an accredited part of the organization. The Division completed the nearly 18-month-long process in December 2006 and auditors scored the agency 100 percent on the mandatory standard requirements and 96.8 percent on the non-mandatory requirements of the American Correctional Association (ACA). The certificate of accreditation was presented at the ACA Winter Conference in January 2007.

## Increased Efficiency & Safety of Probation & Parole

Currently, all P&P supervision staff are equipped with laptops. We are in the process of purchasing the 34 additional laptops for remaining positions to be filled by 7-1-07. In addition to the landmark achievement of national accreditation, this brings probation and parole into a total system of corrections that meets the highest possible standard of operation. Officers are no longer tied to a desk. With the laptop computers, their supervision of offenders has become more mobile and effective and thereby has enhanced public safety. Equipment updates have provided greater safety for Probation and Parole Officers by increasing body armor and the movement toward standardized firearms.

## Expansion of Electronic Monitoring

Basic facts: The 2005 budget bill included legislation that allowed state prison inmates serving a sentence on a Class C or D felony to serve the last 60 days of their sentence on home incarceration using an approved monitoring device. That limitation drastically reduced the number of inmates that participate in the program, therefore reducing the cost savings that was intended by the creation of this statute. Additionally, DOC utilizes electronic monitoring as a graduated sanction for probation and parole offenders. In 2006, the legislature changed the statute to allow state inmates in county jails to participate and they extended the time from 60 days to 90 days.

## Additional Halfway House Beds

In 2006, the Department of Corrections expanded its use of halfway house beds in order to manage the offender population. These beds are substantially less expensive than prison beds. A total of 266 halfway house beds were opened in 2006.

## Substance Abuse Treatment

Prior to 2004, drug and alcohol treatment through DOC consisted of four programs (MAC, GRCC, KCIW and LLCC) with a total treatment capacity of 430 beds. We have substantially increased those treatment opportunities, with options now available in 14 jails and prison-based programs were expanded from four to seven. In 2006, two jail treatment programs were launched: Floyd and Clark counties. Currently, the combined prison and jail treatment beds total 1,364, or almost triple the amount prior to our expansion efforts began in 2004.

## KOMS – Kentucky Offender Management System

Description: Implementation of integrated Offender Management System that supports the way Corrections does business. Replaces current non-integrated information systems/automates current manual processes

## Dedicated Regional Training Center

In 2006 we opened two of our three planned regional training centers. The Eastern Regional Training Center was dedicated on Sept. 1, 2006 as the S.T. Wright Training Building. On Dec. 15, 2006, the Western Regional Training Center was dedicated in honor of Kentucky Supreme Court Justice Bill Cunningham.

## Healthcare Network

What it does:

Kentucky taxpayers now paying approximately 44% less than the Usual and Customary Rate for inmate medical care as result of network.

- Savings of over \$17M in first two fiscal years
- Network provides discounted rates for inmate healthcare by utilizing commercially available agreements between providers, hospitals and insurance companies, such as Bluegrass Health
- Provides hospital and specialty care for more than 18,000 state inmates across Kentucky in 13 prisons and 75 jails.
- Reduces duplicate, inadvertent and errant billing - Approx.: \$7 million over 2 years (had claims been paid)

As a result of the Healthcare Network, the Electronic Medical Record is currently in place at all state prisons. This provides online simultaneous consultations with numerous specialty consultants outside of the DOC resulting in:

- Decreased time from referral to consultation with specialist
- Decreased hospitalization
- Decreased cost of consultative exams
- Decreased transportation expenses
- Elimination of risk to public safety

## Executive Leadership Program

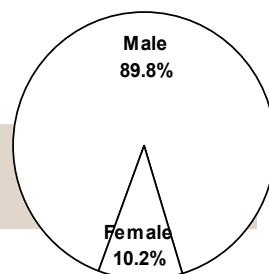

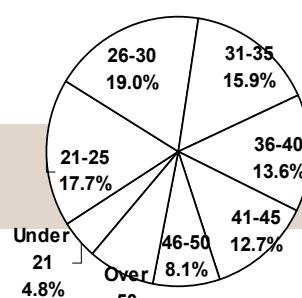

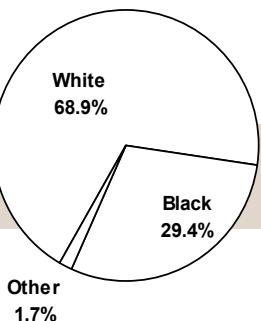

We will continue this very successful program that graduated its first class in April 2006. Thirty-four employees successfully completed the 18-month course. The second class of 44 is currently underway and will graduate in April '07.
